What is PGP

PGP is the licensed software needed to send encrypted emails, In order to send encrypted emails you must send to another PGP user, which can only open up the email message by entering in there secured Password.

PGP encryption

If the PGP Support Package is installed on a BlackBerry device, when a user sends a message from that BlackBerry device, the BlackBerry device encrypts the message using the following process:

- 1. The BlackBerry device encrypts the message using the message recipient's PGP public key.**
- 2. The BlackBerry device uses standard BlackBerry encryption to encrypt the PGP encrypted message.**
- 3. The BlackBerry device sends the encrypted message to the BlackBerry Enterprise Server.**
- 4. The BlackBerry Enterprise Server removes the standard BlackBerry encryption and sends the PGP encrypted message to the recipient.**

If the PGP Support Package is installed on a BlackBerry device, when the BlackBerry device receives a message, the PGP message is encrypted with standard BlackBerry encryption and then decrypted, using the following process:

- 1. The BlackBerry Enterprise Server receives the PGP protected message.**
- 2. The BlackBerry Enterprise Server uses standard BlackBerry encryption to encrypt the PGP encrypted message.**
- 3. The BlackBerry Enterprise Server sends the encrypted message to the BlackBerry device.**
- 4. The BlackBerry device removes the standard BlackBerry encryption and stores the PGP encrypted message.**
- 5. When the user opens the message on the BlackBerry device, the BlackBerry device decrypts the PGP encrypted message and renders the message contents.**

PGP encryption algorithms

The BlackBerry device is designed to support the use of a strong algorithm for PGP encryption. The PGP Allowed Content Ciphers IT policy rule default setting specifies that the BlackBerry device can use any of the supported algorithms to encrypt PGP messages. You can set the PGP Allowed Content Ciphers IT policy rule to encrypt PGP messages using any of AES (256-bit), AES (192-bit), AES (128-bit), CAST (128-bit), and Triple DES (168-bit).

The message recipient's PGP key indicates which content ciphers the recipient can support, and the BlackBerry device is designed to use one of those ciphers. The BlackBerry device encrypts the message using Triple DES by default if the recipient's PGP key does not include a list of ciphers.

Advantages

You can remotely wipe your unit by sending in an email to our customer service department and we will send out a request to have your unit wiped clean in the event your unit has been lost/stolen or in the hands of someone you don't want to have your unit.

Allows you to communicate to others with secured encrypted software, there is a huge market of Blackberry users who wish to stay anonymous and to be able to send and receive messages surely and are willing a fair price for that security, now with our system you can do so effortlessly and make great money at the same time.

Services Available

We offer regular pin to pin service through Tmobile which does not have added encryption as well as the PGP Encryption – See Price List for Options/Prices accordingly

We offer 7 day a week customer/technical support for dealers/customers alike by email, you can email us with all issues that you may face

Dealer Services

Once you can maintain a min of 10 new activations per month, We will supply you with banners, posters and brochures for your business to help promote the products/services.

Payments

All payments must be made by either wire transfer or by making a cash deposit, You can go to any TD branch with our account details and make a cash deposit, Please reference the Invoice # when you make the deposit.

How to Order

You can order all products online by visiting www.wirelesswarehouseusa.com, choose the Category/Products – PGP/Blackberry Service ,

When checking out, use the COD payment option then once done choose to print out your invoice, then you can either do a wire transfer or cash deposit at any TD Canada Trust branch. Once you make your payment, please fax over a copy of your receipt to our accounting department at 519-488-1135, So they can process and ship your order.

Inventory Options

In order to help you sell more products we offer the following options,

We will be able to send you units so you can have them on hand, all you will need to is 50% up front and upon activating you will have to pay the remainder 50% within 48 hours. However if for any reason you still have the units on hand within 30 days and you can't sell them, Then you can send them back for new units or you will have to make payment for the units you have in your stock which are inactivated.

Also if you have your own units you would like to sell, we can supply you with sim cards and then whenever you are selling them, All you have to do is send our customer care department an email with the sim # and Pin # and we will activate the sim card with either PGP or Tmobile Pin to Pin service whatever you require. Then you have up to 48 hours to make payment on the sim cards you activated or they will be suspended until you make a payment. By doing this we help you not to use your own money for service, We give you the opportunity to sell the product, collect your money and then pay us what is owed.

Shipping and Handling

If you order less than 4 phones per shipment, we charge \$25.00 flat rate express shipping, 4 phones or more, we offer Free shipping and handling.

FAQ

How do I activate my Units if I order them none activate?

All you have to do is send an email to customer service with the email address of the unit you need activated and we will have it activated within 30 minutes.
